ProfitLens AI:
Shop Health Checker

Understand your shop’s health.
Make smarter business decisions.

AMD Developer Hackathon ACT III

Track 3: **Commerce**

Team: ProfitLens AI

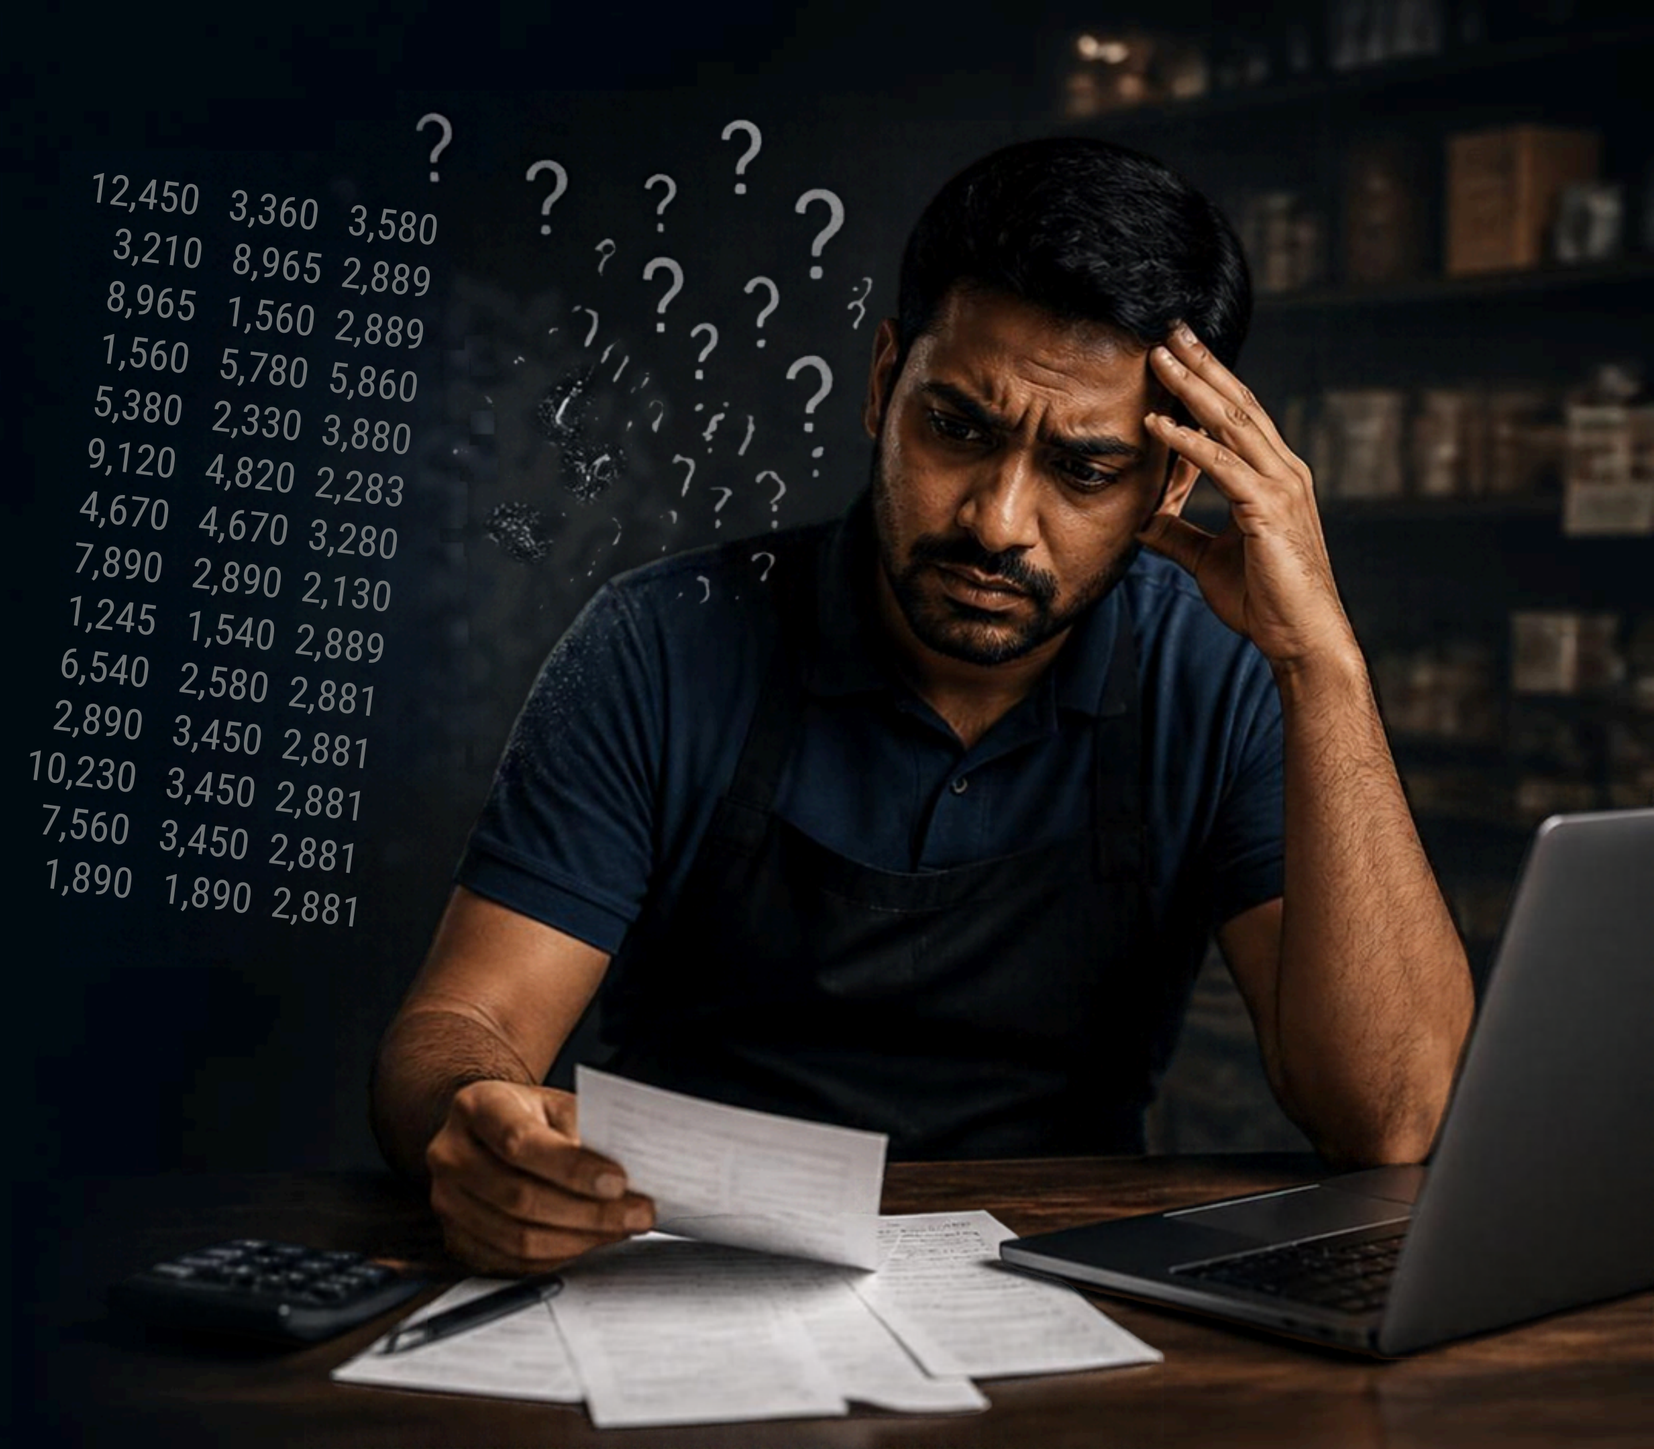

THE PROBLEM

Small shops struggle to make sense of raw sales and expense data

Numbers alone hide issues until problems grow

Owners need clear, practical insights they can act on

Decisions shouldn't be guesswork

ONE SHOP.
ONE CLEAR HEALTH REPORT.

The ProfitLens AI Shop Health Checker workflow

1

Open ProfitLens AI

2

Select shop from dropdown

3

Retrieve available business data

4

Scoring API and AI analysis generate health assessment

5

Dashboard shows insights & recommendations

AI workflow is **PLANNED**

Until live /api/check endpoint integration and testing are complete

PRODUCT DEMO

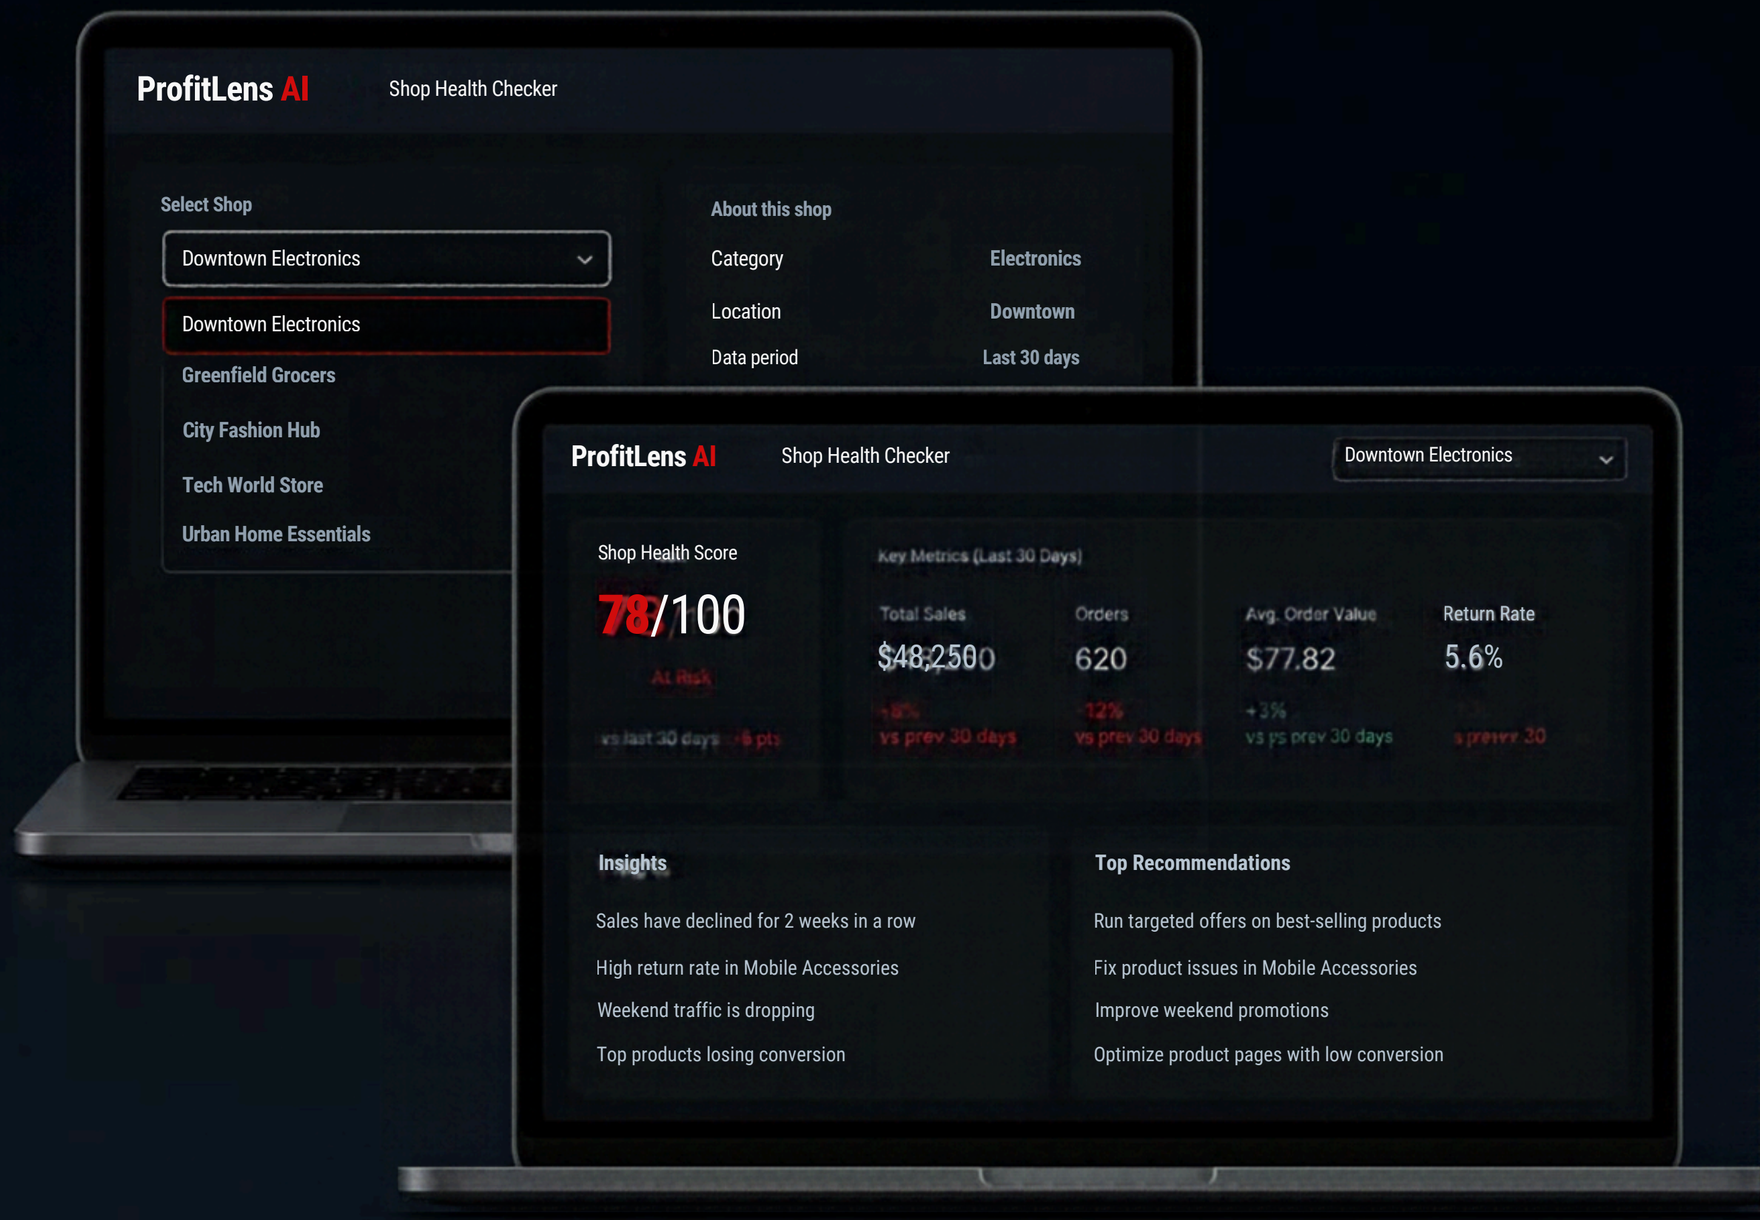

Select any shop to view its performance instantly

Health score and key metrics at a glance

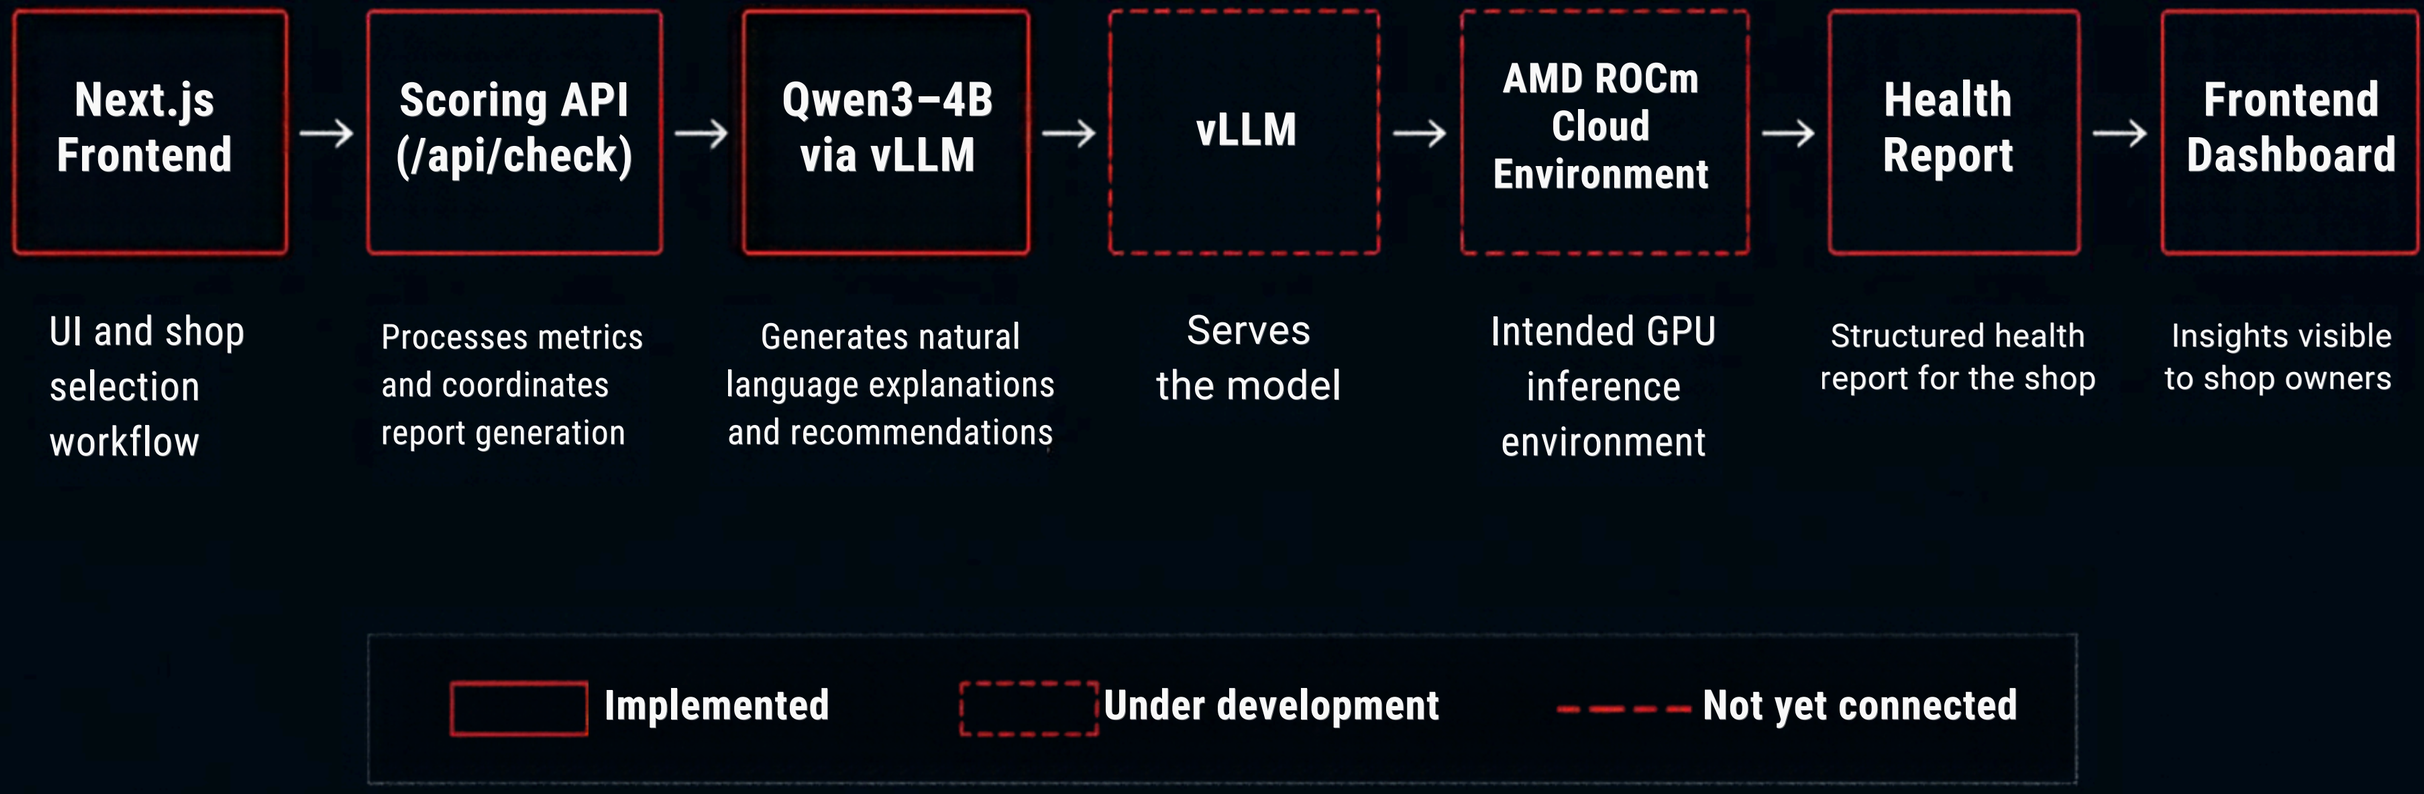

Insights reveal what's driving performance

Smart recommendations to focus on what matters

Note: All data shown is mock data for demonstration purposes.

FROM SHOP DATA
TO ACTIONABLE INSIGHTS

TURNING BUSINESS DATA INTO DECISIONS

01
We assess shop performance from key metrics

02
We identify notable patterns or concerns

03
We explain findings in plain language

04
We suggest practical next steps

EXAMPLE INSIGHT

Sales are down 8.6% overall.
Fewer units sold is the main driver.
Top category sales are up.
Average order value has improved.

WHAT IT MEANS

Lower footfall or fewer purchases is reducing total sales.
Strong performance in the top category and higher order value show customer loyalty remains.

RECOMMENDED NEXT STEP

Run in-store promotions to drive more transactions. Encourage cross-sell with relevant add-on offers.

BUILT FOR AI-POWERED COMMERCE

AMD INTEGRATION PLAN

Qwen3-4B via vLLM
for inference

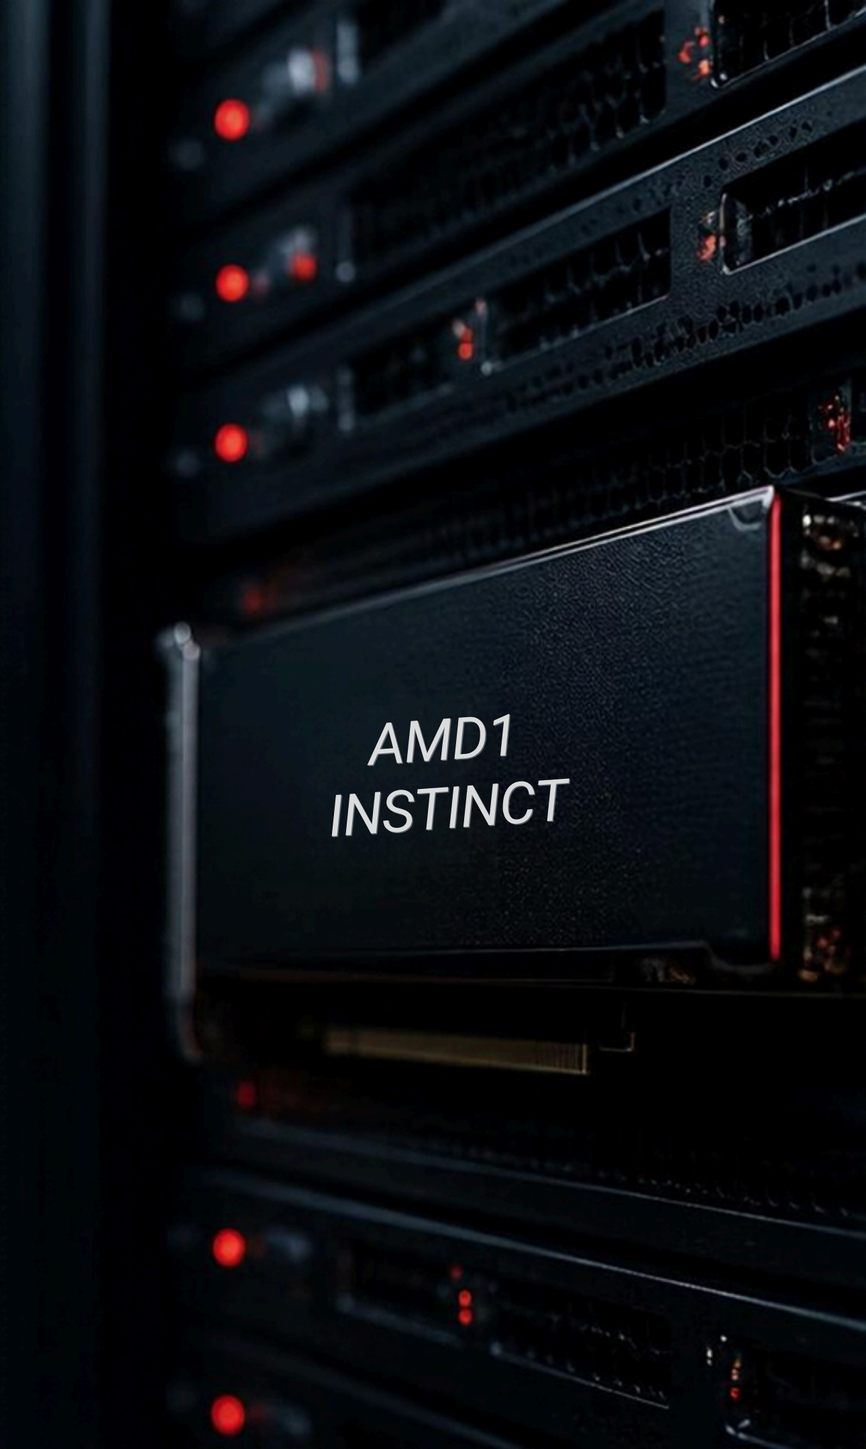

→

AMD ROCm cloud
for GPU acceleration

→

Scoring API
connects backend to frontend

IMPLEMENTED	IN PROGRESS	TO VALIDATE
Next.js frontend shop dropdown dashboard connected to mock data	live /api/check endpoint and AI backend integration	end-to-end report generation recommendation correctness response latency reliability

HELPING SMALL SHOPS
MAKE SMARTER DECISIONS

Simplify understanding of shop performance

Transform business data
into actionable insights

Enable owners to identify issues and
make informed decisions

ProfitLens AI

Shop Health Checker

From business data to better decisions.

THANK YOU
