ProfitLens AI

Turn Everyday Receipts into Smarter Business Decisions

An AI-powered business intelligence assistant for small shop owners

AMD Developer Hackathon | Team Project

The Problem

Managing business data shouldn’t be this hard.

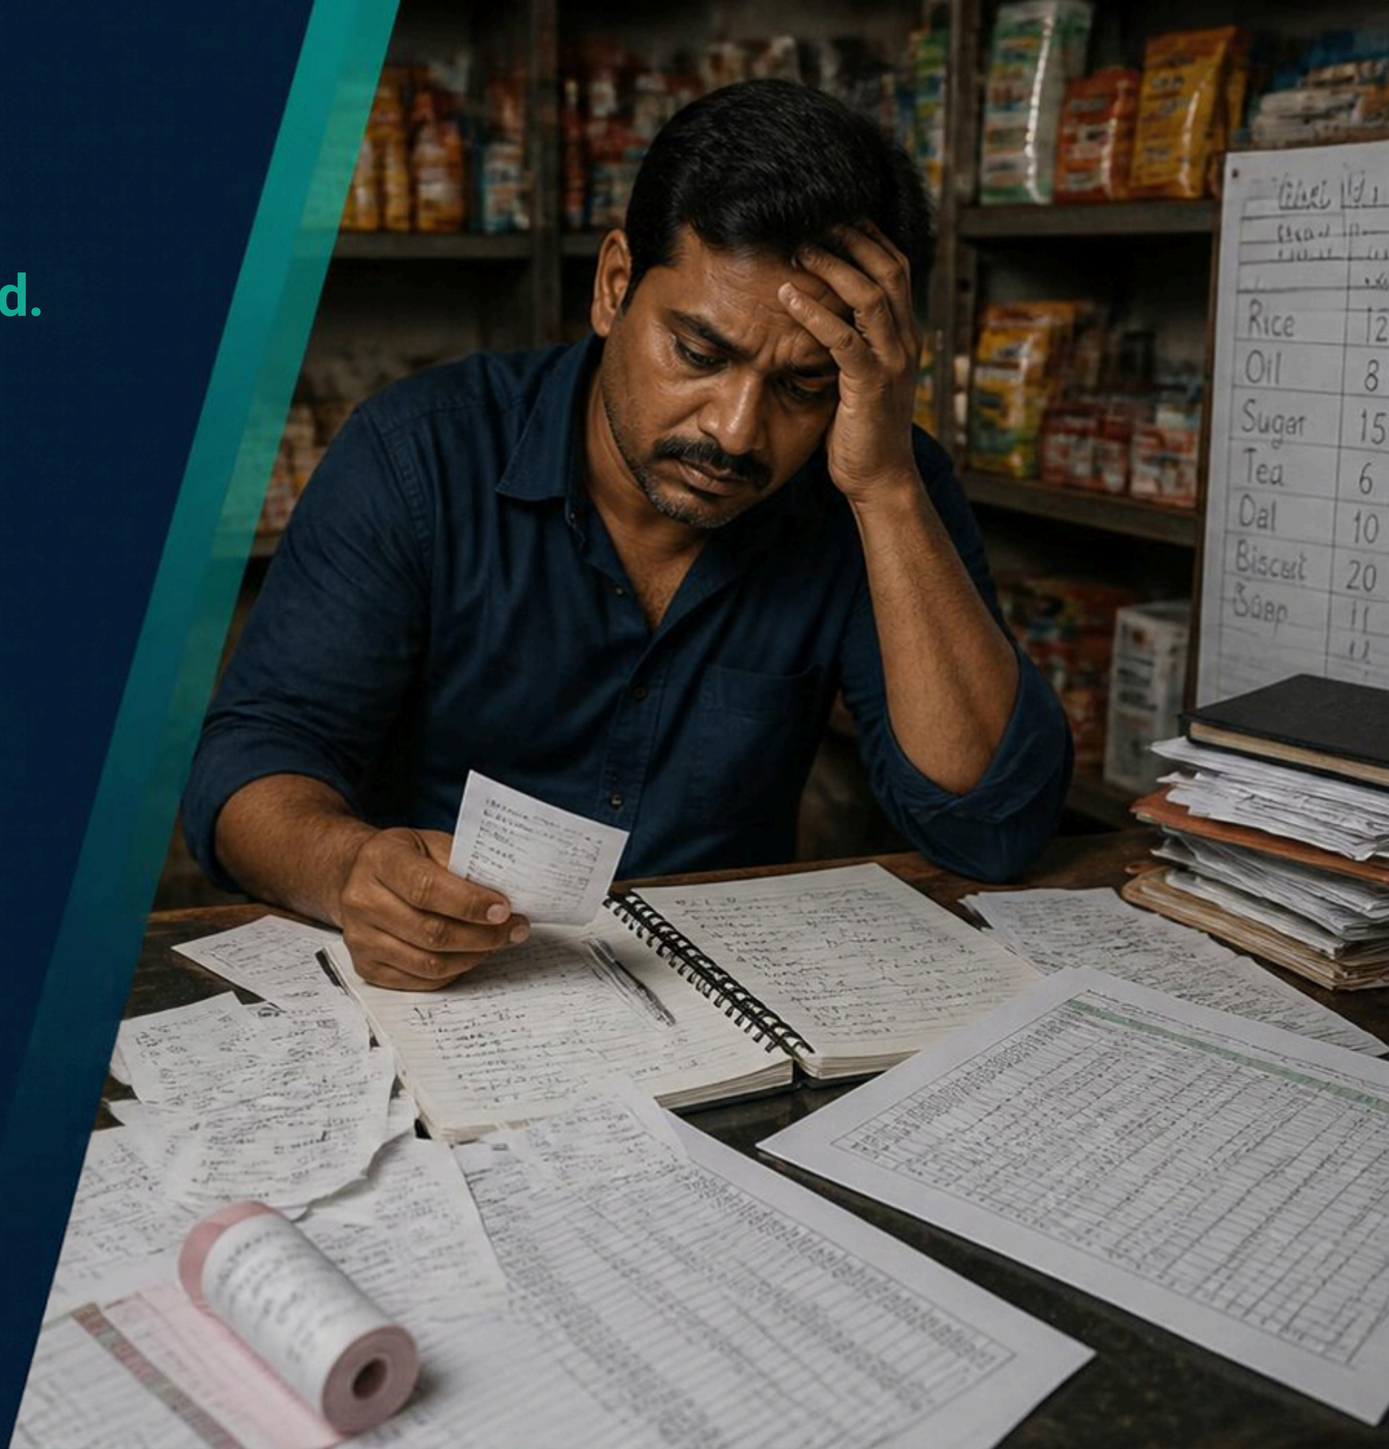
Data scattered across receipts, invoices, and bills

Hard to spot profitable days and slow-moving products

Inventory decisions based on guesswork, not clear insights

Analytics tools that are expensive or too complex

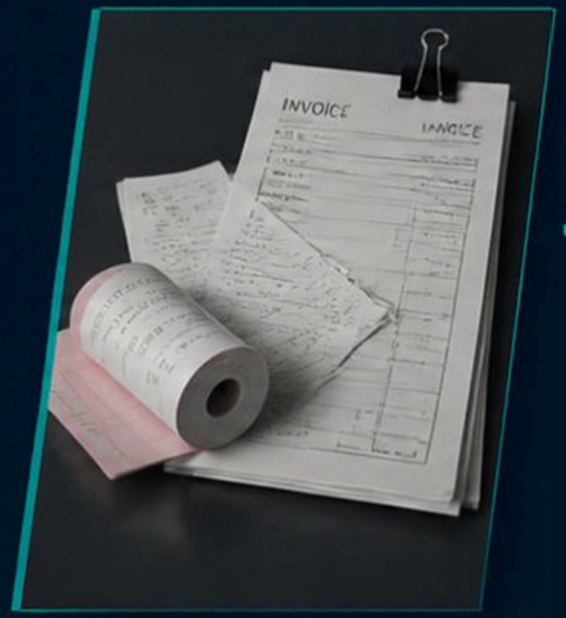
Small shops need simple, actionable insights without the complexity.



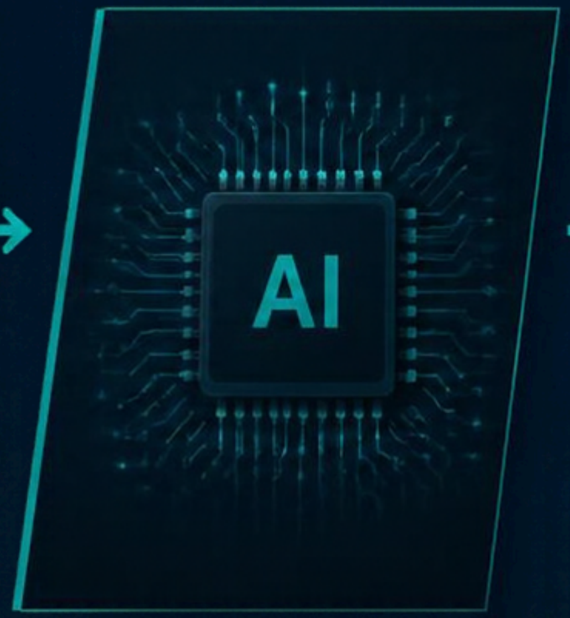
Our Solution

ProfitLens AI turns business data into clear, actionable insights.

01
Upload
Add your receipts, invoices, and sales records in seconds.

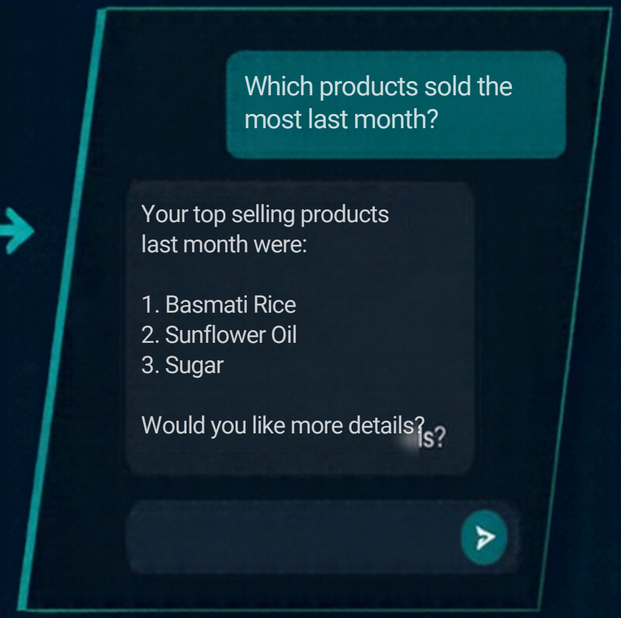


02
AI Processing
Automatic extraction and organization.



03
Dashboard Insights
See sales, expenses, and profit trends at a glance.

04
Ask & Understand
Ask questions in natural language and get answers.



How It Works

From messy data to clear actions in five simple steps.

01

Upload your receipts, invoices, or sales records

02

AI extracts key data using vision and document models

03

Structured data is analyzed to spot trends

04

Smart recommendations for inventory and business actions

05

Ask questions and get instant answers

Product Demo

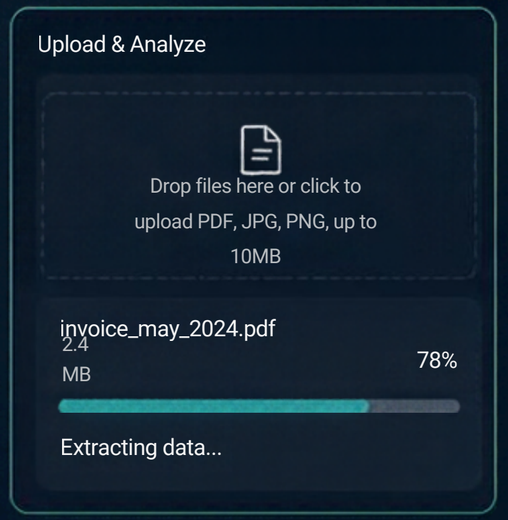
See ProfitLens AI in action.

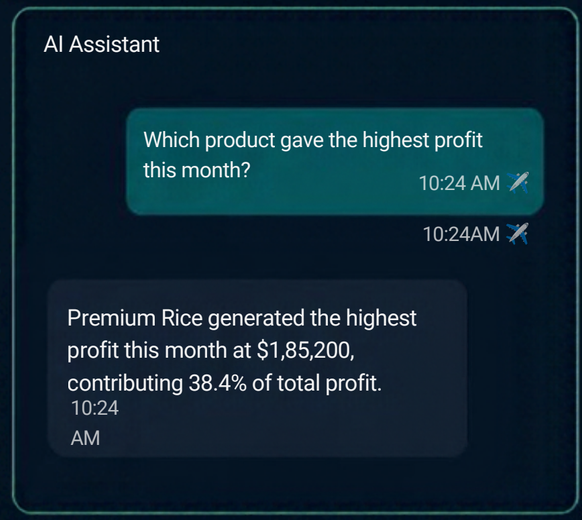
Real business metrics
in one clear dashboard

Upload documents and
get instant extraction

AI-generated reports with
key trends and insights

Ask questions, get answers
backed by your data





AI Features

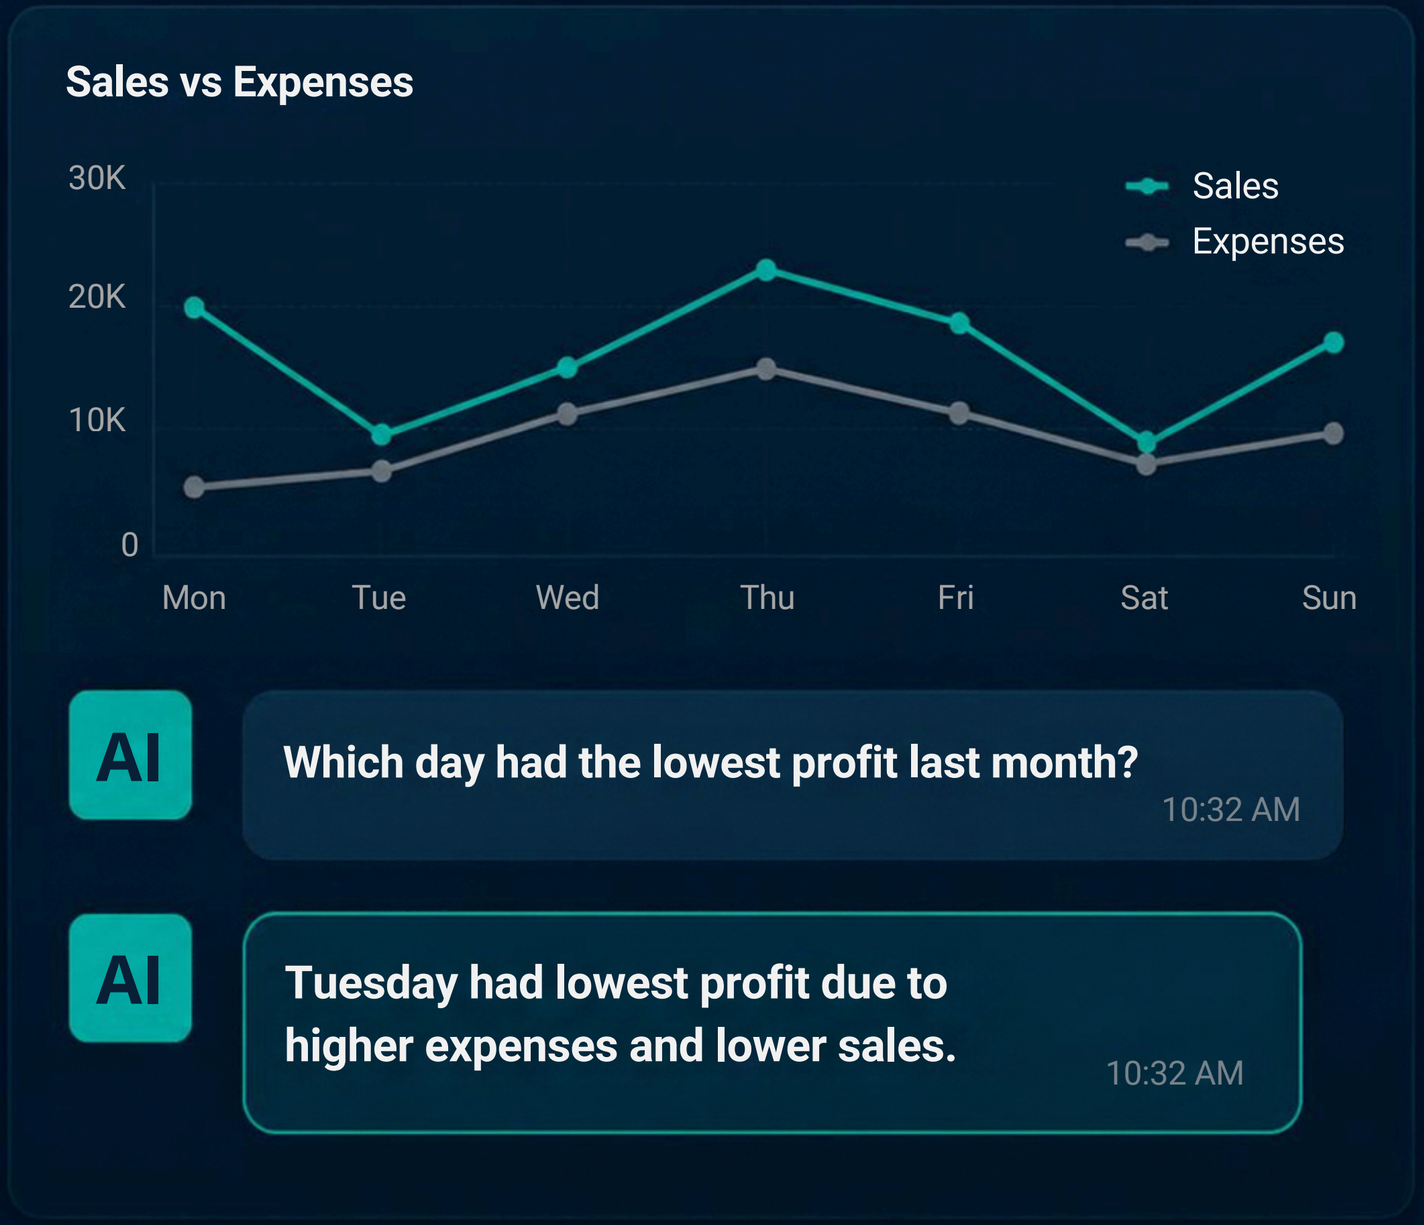
Intelligent insights beyond raw data.

Understand documents
Extract figures and product details
from receipts

Analyze your business
Calculate sales patterns
and key metrics

Monitor inventory
Flag items running low
when inventory data is available

Ask. Get answers.
Natural language assistant
grounded in your records



AMD Technology Integration

Real AMD GPU power driving intelligent insights.

USER INTERFACE

Business data and queries submitted

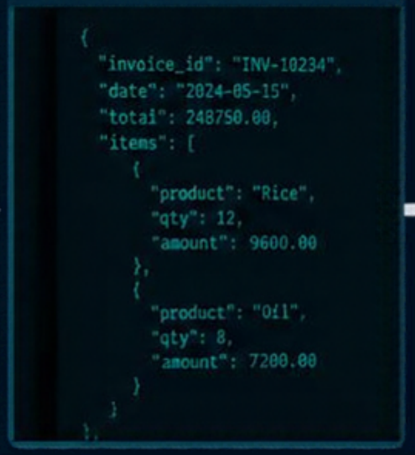
BACKEND API

Secure processing and orchestration

AMD GPU / ROCM AI INFERENCE

Accelerated AI inference on AMD GPU (ROCm)

STRUCTURED DATA



Extracted and organized business information

INSIGHTS DASHBOARD

Actionable insights for better decisions

BUILT ON REAL AMD HARDWARE

- AI inference runs on AMD GPUs using the ROCm environment
- GPU-accelerated models for document understanding and language processing
- AI outputs combined with business logic to deliver clear, actionable insights
- Prototype validated with live workflows, model logs, and end-to-end execution

What Makes Us Different?

ProfitLens AI turns everyday records into clear, actionable insights.

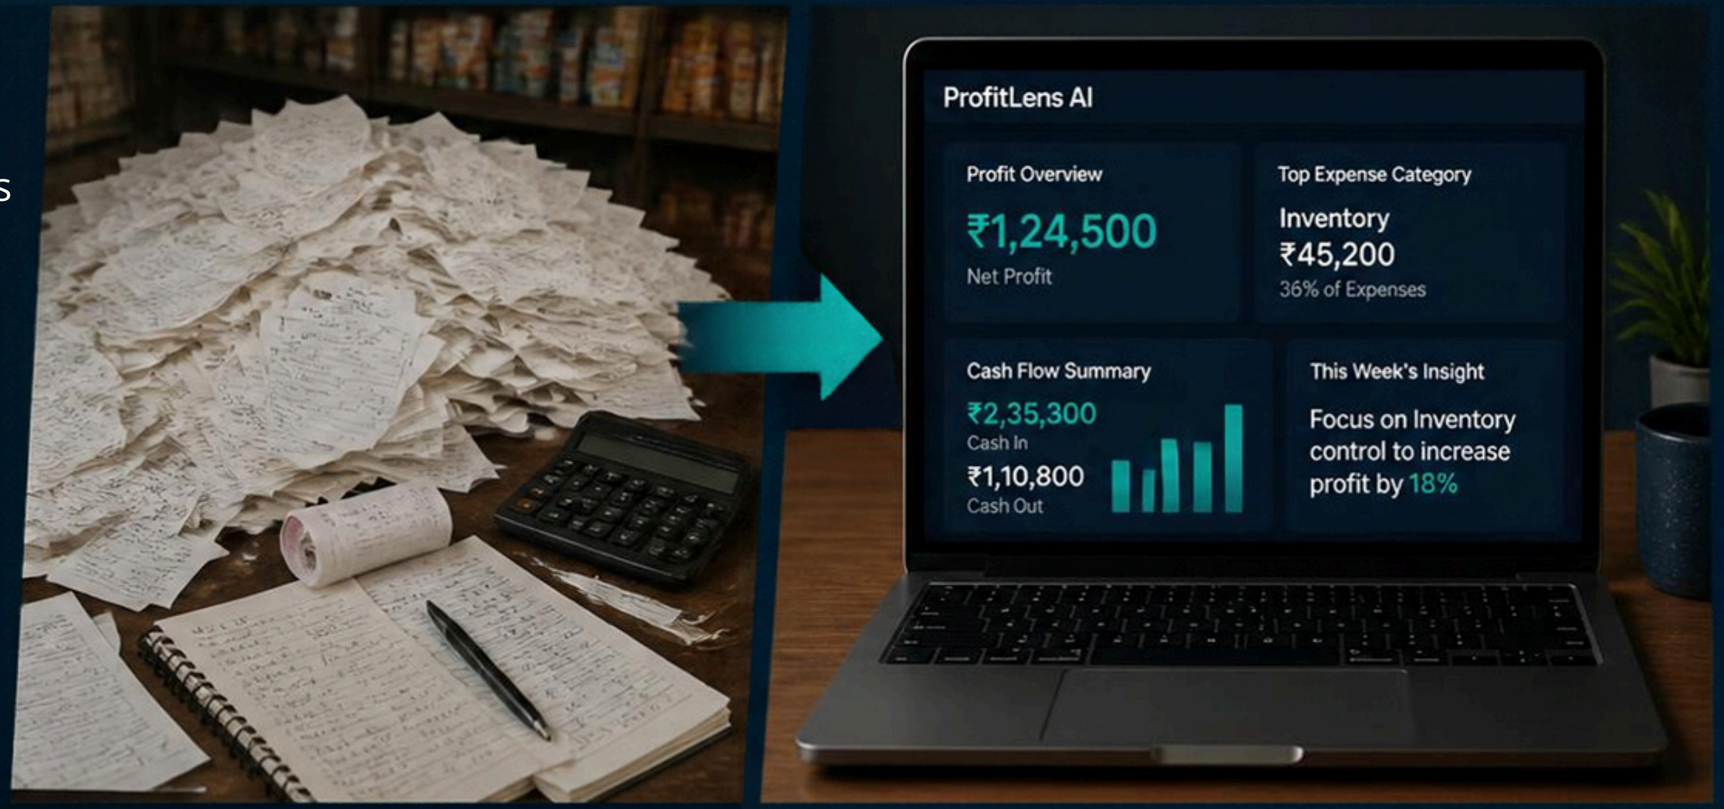
FROM CHAOS

Scattered receipts and invoices

Hard to find key information

Guesswork in decisions

Time lost on manual work



TO CLARITY

Focused on everyday business records

AI that reads, analyzes, and understands

Clear, actionable insights you can use

Built for everyone, no technical skills needed

Less clutter. Less guesswork.

More clarity. More profit.

ProfitLens AI

Your AI-powered business intelligence assistant

Impact and Future Scope

Real benefits today. More intelligence tomorrow.

REAL IMPACT

Reduces manual data organizing effort

Improves visibility into sales and expenses

Supports smarter inventory planning

Makes analytics easier to access

FUTURE OPPORTUNITIES

Point-of-sale integration

Multiple currency and locale support

Historical forecasting (data permitting)

Stronger extraction accuracy through feedback loops

Less Guesswork. More Insight.

ProfitLens AI empowers small shop owners to understand business data and make better decisions

Upload. Understand. Improve.

Thank you.
